Summary

Highly motivated and versatile developer with a proven ability to deliver robust, scalable solutions across a variety of projects in dynamic environments. I am passionate about continuous learning and growth, consistently seeking opportunities to expand my knowledge and skillset while staying ahead of the latest trends and technologies in the industry. With a strong foundation in problem-solving and technical expertise, I am eager to contribute to innovative and impactful projects, helping businesses achieve their goals efficiently and effectively.

Experience

Full Stack Developer

CodeforceVina · District 5, Ho Chi Minh City   05/2023 - Present

- Built a **Web Builder** for real estate companies to create, customize, and deploy websites for buying or renting real estate properties use React, Node.js and MySQL.
- Develop a system where users can design various pages such as home, search result, property details, providing real estate companies with flexible website creation capabilities.
- Enabled customization of multiple sections across pages, giving users full control over the layout and presentation of their websites.
- Integrated SSL certificate and deployment, enabling users to seamlessly secure and publish their websites.
- Optimized the web builder for ease of use, ensuring that even non-technical users could create professional-grade websites with customizable themes and responsive designs.

Full Stack Developer

TMA Solutions · District 12, Ho Chi Minh City   11/2022 - 03/2023

- Developed an **Internship Management Application** using Angular and Node.js, managing interns' profiles, internship dates, and progress tracking.
- Implemented features to schedule interviews, manage appointments, and automatically generate weekly reports to summarize interns' tasks and progress.
- Enhanced system functionalities to streamline the management process for both interns and supervisors.
- Worked closely with the project management and UX/UI design teams to ensure seamless integration of features and alignment with user requirements, leading to higher user satisfaction.
